

To reconstruct the original CD data on your harddisk, please proceed as follows :

- ➔ 1. Download following files from the website (download page of the Tevion model P1123) :
CD.part1.exe (8,3MB)
CD.part2.rar (7,2MB)
and put them together in the same directory on your harddrive.
- ➔ 2. In order to execute CD.part1.exe, double click on the file. A window pops up in which you can assign the directory in which the original files will be reconstructed from the archive. If you do not alter the preset value, the original files will be reconstructed in the download directory (approx. 16MB)
